

Celebrate Earth Day!

THE SEARCH FOR BETTER CONSERVATION- Describes in simple language and with many illustrations threats to the environment and ways of alleviating those threats.

COASTAL RESCUE: Preserving Our Seashores- Examines different types of coasts, how they are shaped by nature, how the development of coasts has destroyed plant and animal life, beaches, and marshes, and ways to use the coast's valuable resources and still preserve them.

JANICE VANCLEAVE'S ECOLOGY FOR EVERY KID- Experiments and activities, using everyday materials, designed to teach facts, concepts, and problem solving strategies for helping the environment.

A LOOK AT EARTH- An introduction to Earth, the third planet from the sun, discussing its orbit and axis, providing facts about the Earth and its moon, and looking at the atmosphere, oceans, and interior of the ever-changing planet.

EARTH: THE THIRD PLANET- Describes the third planet from the sun, including its orbit, seasons, gravity, geology, and life.
