

# Celebrate Earth Day!

**ROLL ON, MANATEE (video)** Looks at the gentle and amazing manatee, and how its survival is threatened by human encroachment on its habitat.

**THE GREENHOUSE EFFECT (video)**-Develops an understanding of the greenhouse effect on Earth and provides insight into the ongoing scientific and public debate over global warming"--container.

**CHANGES IN LATITUDES (book on tape)**-Ten year old Teddy is obsessed with saving endangered sea turtles—an obsession, it turns out, that will change the course of his life.

**THE MOST SCENIC DRIVES IN AMERICA (reference book)** Describes 120 scenic drives for exploring the United States, grouped into four regions, including the Western, Rocky Mountain, Central, and Eastern states; each with route maps, photographs, travel tips, and information about places to eat, sleep, and visit

**CONCISE ENCYCLOPEDIA EARTH (reference book)**-Presents the principles of Earth science, discussing such topics as the structure and chemical makeup of the Earth, geological dating, world biomes, and the atmosphere.
