

Celebrate Earth Day!

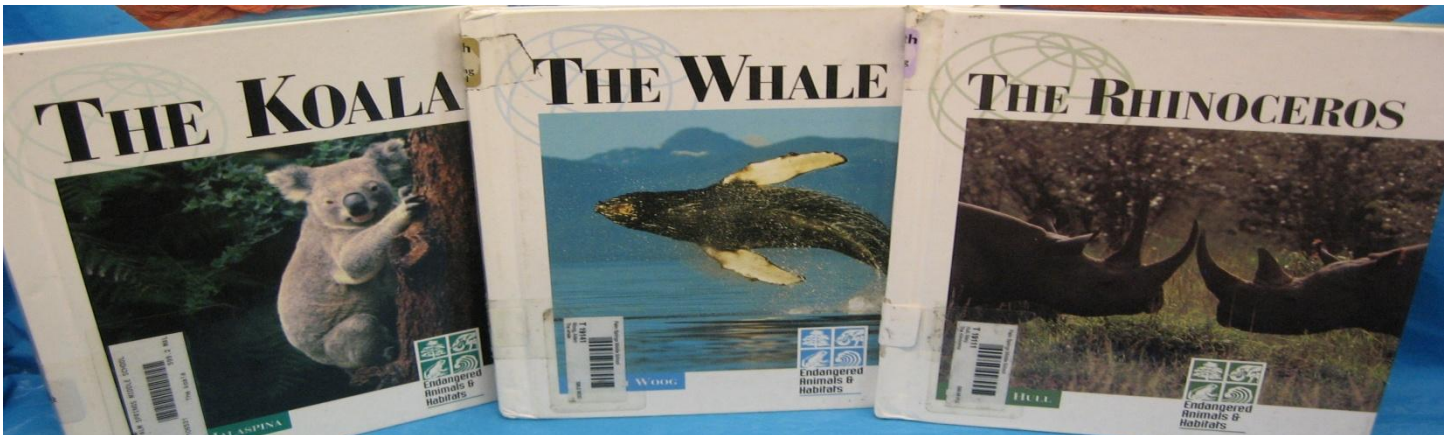

ENDANGERED ANIMALS & HABITATS SERIES

THE WOLF- Details the characteristics, habitats, and life cycle of wolves.

THE GIANT PANDA- Discusses the forces pushing the giant panda toward extinction and the efforts being made to counter those forces.

THE BALD EAGLE- Describes the physical characteristics and habits of bald eagles, threats to their existence, changes in their habitats, and efforts to protect these birds.

THE KOALA- Provides information about the behaviors of the koala, a marsupial that lives only in Australia, and discusses how the destruction of the animal's primary habitat and food source--the eucalyptus tree--is endangering its future.

THE WHALE- Presents an overview of various species of whale, how they have become endangered, and what is being done to protect them from extinction.

THE RHINOCEROS- Presents an overview of various species of rhinoceroses, how they have become endangered, and what is being done to protect them from extinction.
