

Celebrate Earth Day!

Graphic Science Series

FOOD CHAINS- a healthy environment means a healthy food chains

ECOSYSTEMS- we must do our part to care for the plants, animals, and environment around us in this ecosystem.

ADAPTATION-Camouflage is an adaptation some animals use to avoid being eaten by predators. If their habitat is altered some of them become preys and some learn how to adapt to its new habitat for survival.

PHOTOSYNTHESIS-plant trees to help reduce the pollution we do create .
