## Practice

Form G

---

### Two-Variable Inequalities

Graph each inequality.

1.  $y < x$

2.  $y \geq x$

3.  $y > 2$

4.  $y < 2$

5.  $x \leq 2$

6.  $-2y \leq -x - 2$

7.  $-2x - y - 1$

8.  $y \geq 3x - 4$

9. You have a \$25 calling card. Calls made using the card within the United States cost \$.10 per minute while calls made from the US to France cost \$.25 per minute.

- a. Write an inequality that relates the number of minutes  $x$  you can use for calls within the U.S. and the number of minutes  $y$  you can use for calls from the U.S. to France.
- b. Graph the inequality.

Graph each absolute value inequality.

10.  $y \geq |x|$

11.  $y > |x + 2|$

12.  $y \leq |x - 2|$

13.  $y > |x| + 2$

Write an inequality for each graph. The equation for the boundary line is given.

14.  $y - 2x = 4$

15.  $-2x - 3y = 6$

16.  $3y = |x - 3|$

# 2-8

## Practice (continued) Two-Variable Inequalities

Form G

Graph each inequality on a coordinate plane.

17.  $4x + 2y \leq 8$

18.  $3x \leq 5y$

19.  $y > -\frac{1}{6}x - 1$

20.  $y \geq \left| \frac{1}{6}x \right| - 3$

Write an inequality for each graph.

27. **Open-Ended** Write an inequality that includes  $(0, 9)$ ,  $(-10, 10)$ ,  $(10, -20)$ , and  $(-20, 15)$  as solutions.

28. A salesperson sells two models of vacuum cleaners. One brand sells for \$150 each and the other sells for \$200 each. The salesperson has a weekly sales goal of at least \$1800.

- Write an inequality relating the revenue from the vacuum cleaners to the sales goal.
- Graph the inequality.
- If the salesperson sold exactly six \$200 models last week, how many \$150 models did she have to sell to make her sales goal?
