

Sketchbook Assignment One:

Study of organic structure

Develop a two page spread (the left and right pages) of an organic form such as an orange, banana, tomato, or another similar form that can be opened and observed.

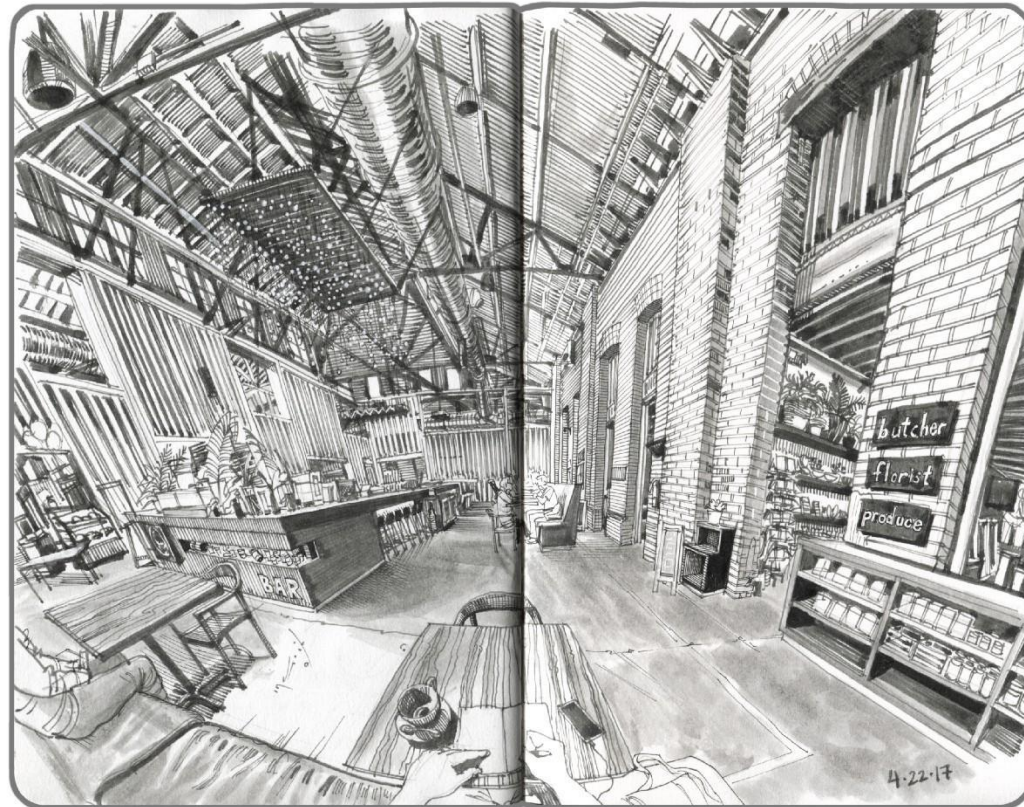

Looking at the actual object in front of you carefully is the key objective of this assignment. Do not work from a photo or screen image.

Draw the form several times from different angles

Draw the edges of the structure in line

Describe the structure if its parts the peel seeds etcetera...

Sketchbook Assignment Two:

Study of a space

Develop five pages of several spaces in your home, this could be parts of the same room or different rooms.

Looking at the actual space .

Draw using line and follow the contour (edge of the surfaces)

You may add value (color tone the lights and darks) in your studies.

Sketchbook Assignment Three:

Study of designed object A Gatorade Bottle

Develop five pages of one mass produced object such as a gatorade bottle. Remove the label and look only at its structure. You will make several drawings in line, drawings of value and drawings of shape.

Looking at the actual object as you work.

Draw using line and follow the contour (edge of the surfaces)

Look at the paper cut outs cut paper to look at the shape of the bottle and look at the shape around the object .
